

**SAP BUSINESS SOFTWARE
FOR \$149/MONTH,
NO I.T. NEEDED,
IN ABOUT 12 WEEKS.**

THAT'S RIGHT

THE BIG LEAGUES.

NOW, VERY AFFORDABLE.

**SEE MORE.
GROW MORE.
DO MORE.**
BY DESIGN.

Now, the world's most powerful business software is available as a service—scaled to the perfect size and the perfect price, and ready to grow when you are.

Your portfolio companies don't have to settle for the limitations of basic accounting and spreadsheet programs. Because SAP Business ByDesign delivers the deep capabilities you need to take control of your companies from top to bottom—at an amazingly affordable cost of just \$149/month per user.

Best of all, SAP Business ByDesign is software-as-a-service (SaaS). So there's nothing to install or maintain, and no need for IT. And it can be up and running in about 12 weeks.

It's just what you need to take your portfolio companies into the big leagues and achieve a faster, more profitable exit.

A CHIP OFF THE OLD BLOCK.

NOW, THE WORLD'S MOST POWERFUL BUSINESS SOFTWARE IS SCALED TO THE PERFECT SIZE AT THE PERFECT PRICE.

Big things do come in small packages.

Your portfolio companies don't have to settle for the limitations of basic accounting and spreadsheet programs. Because SAP Business ByDesign delivers the deep capabilities you need to take control of your companies from top to bottom—at an amazingly affordable cost of just \$149/month per user.

Best of all, SAP Business ByDesign is software-as-a-service (SaaS). So there's nothing to install or maintain, and no need for IT. And it can be up and running in about 12 weeks.

It's just what you need to take your portfolio companies into the big leagues and achieve a faster, more profitable exit.

HOW CAN YOU RUN YOUR PORTFOLIO IF YOU CAN'T SEE WHAT'S GOING ON?

Total Visibility. Total Control.

When your portfolio companies were smaller, you could see them all on a simple spreadsheet. But those days are gone, and you can feel your control slipping away.

Dwindling Cash Flow

Your companies are growing so fast that billing can't keep up, and cash flow is at a trickle. Even worse, you can't tell where the chokepoints are located.

Order Backlogs

Orders are late, customers are screaming, and you're paying a fortune for rush processing. If only you could match inventory with demand, and track orders at every stage.

Reporting Delays

There's no single version of the truth. So it's hard to make decisions—and even harder to satisfy your board and your auditors.

Delinquent Receivables

You know that too many invoices are delinquent, but who has time to follow up?

Dysfunctional Supply Chain

There's no interaction among internal departments—let alone external suppliers—and excess inventory costs are killing you. You'd like to adopt make-to-stock or make-to-order, but without real-time data, that's just a dream.

Human Resources Mismanagement

Your entire HR file is locked inside a spreadsheet. Time and expense reports are piling up. Overtime is chronically miscalculated. And it's getting harder to retain talent without a well-managed benefits plan.

Inefficient Talent Management

Your companies are full of great people, but you're not making the most of their abilities.

You need best practices.

With SAP Business ByDesign, your companies will have the same tools and best practices as their biggest competitors. So they can deliver better products, better pricing, and better customer support. Unleash their inner giants.

You need to get productive in no time flat.

Any company can be up and running in about 12 weeks — with minimal disruption. And employees will have an intuitive application that automates routine tasks, fosters collaboration, and pushes information to the right people at the right time.

You need affordable, predictable costs.

All this performance is yours at just \$149/month per user — with no need for IT. Add or subtract users at any time. And put your capital to work elsewhere.

You need a fast exit.

If your portfolio companies can't scale, you can't exit. With SAP Business ByDesign, your companies can develop a clear path to growth — and a clear exit strategy.

You need unlimited potential.

Go ahead, change a business model. Expand a customer or supplier base. Add a new location — or a dozen. Make an acquisition. Whatever your companies do, they'll never outgrow SAP.

AFTER NEARLY 100,000 CUSTOMERS
WE KNOW WHAT YOUR BUSINESS NEEDS.

When you think SAP, you think big business software. And you're right.

Our solutions are used by nearly 100,000 customers — including the world's biggest and best-run businesses.

Now, SAP Business ByDesign delivers those same world-class capabilities — at the perfect size and perfect price for your fast-growing portfolio companies. So you can gain total visibility and control over cash flow, order management, reporting, finance, supply chain, HR, executive management, and much more.
